EXECUTIVE SUMMARY

Final-year B.Tech in Information Technology (Honors) student with a strong foundation in DevOps practices, including CI/CD pipeline implementation, containerization (Docker), and infrastructure-focused software deployment. Proficient in Java, Python, and SQL with experience building and maintaining reliable, scalable systems. Skilled in full-stack web application development with a focus on role-based access, authentication, and database integration. Experienced in bridging development and operations to ensure smooth, automated, and production-ready deployments in real-world environments.

EDUCATION

- | | |
|---|-------------|
| • B.Tech (Information Technology (Honors)), PTU | CGPA: 8.32 |
| • Intermediate (12th), ICSE Board | 89%, 2021 |
| • High School (10th), ICSE Board | 90.6%, 2019 |

TECHNICAL SKILLS

- **DevOps and Cloud:** Docker, Kubernetes, CI/CD, Git/GitHub, GCP (basics)
- **Languages :** Python, Java, BASH/Shell Scripting, JavaScript (ES6)
- **Infrastructure & Security:** Trivy, SonarQube
- **Frameworks:** Bootstrap, Express JS
- **Databases:** MySQL, MongoDB
- **Tools:** Git, GitHub, Docker, Kubernetes, Trivy, SonarQube XAMPP
- **Development:** OOP, Data Structures, Software Testing, Express JS

INTERNSHIP PROJECT

Full Stack Web Development Intern | Innovaneers Technologies Pvt. Ltd. Jun 2025 - Jul 2025

- Tech Stack: ASP.NET Core MVC, MySQL, Bootstrap, JavaScript, AJAX
- Built role-based authentication with secure login, password reset, and session management
 - Developed lead lifecycle workflow (New → Disbursed) with assignment system and audit trails
 - Created dynamic dashboards per role with real-time metrics and analytics filters

PROJECTS

Autonomous DevSecOps Remediation Pipeline

- Tech Stack: Python, Groq AI, FastAPI, React, Docker, Kubernetes, GitHub Actions
- Designed a unified orchestration system that seamlessly connects code scanning, AI remediation, container patching, and GitOps deployment into a single automated workflow from commit to production
 - Engineered an end-to-end autonomous security pipeline that detects, correlates, and fixes vulnerabilities across multiple languages codebases, reducing manual remediation effort by 90-95% through AI-powered code generation and automated pull request creation
 - Built a self-learning feedback mechanism that analyzes fix acceptance rates from production deployments and dynamically refines AI prompts, achieving 35% improvement in remediation accuracy over three months without manual retraining

Student Internal Marks Evaluation System

- Tech Stack: MySQL, JavaScript, HTML/CSS
- Engineered an interactive academic dashboard using Chart.js that visualizes student performance across 8+ metrics, reducing data analysis time by 85% through real-time grade calculations and subject-wise breakdowns
 - Implemented client-side algorithms for complex academic rules including "best 2 of 3 CAT exams" calculation and attendance-to-marks conversion with 100% accuracy
 - Built responsive data visualizations with progressive enhancement that handle 500+ data points while maintaining 60fps performance across all devices

CERTIFICATIONS & ACTIVITIES

Certifications:

- Certified Workshop on UI/UX, Software Testing & Automation [Apr' 2025]
- J.P. Morgan - Software Engineering Job Simulation [Oct' 2025]

Achievements:

- National Service Scheme (NSS) | Led community service initiatives [Mar' 2023- Apr' 2025]

Courses:

- NxtWave CCBP 4.0 - Full Stack Web Development & DSA [Ongoing]
- Introduction to Cognitive Psychology - Nptel, IIT Guwahati [Jan' - Apr' 2025]
- Wildlife Ecology - Nptel, IIT Kanpur [Apr' 2025]
